LANODIP PRE-POST
RTU PRE AND POST-MILKING IODINE TEAT HYGIENE PRODUCT

- Teats can be sprayed or immersed
- Contains the power of Iodophor & Lactic Acid
- Contains Glycerine for superior teat condition
- Low pH level without causing irritation
- Easy to apply with low wastage

RECOMMENDED USAGE

PRE-MILKING
Clean teats pre-milking routine:

1. The product should be used directly from the container without dilution.
2. Dry wipe udders with a paper towel. Use one disposable towel per cow.
3. Forestrip each teat.
4. Fill teat cup 2/3 full of product and immerse each teat ensuring that the entire surface of the teat is covered OR Spray the full length of each teat. Allow a minimum contact time of 30 seconds.
5. Refill the teat cup as necessary. Teat cups should be emptied after use and washed before re-use.
6. Dry teats thoroughly with a paper towel to remove iodine residue. Use one towel per cow.

POST-MILKING

1. The product should be used directly from the container without dilution.
2. Fill teat cup 2/3 full of product and immerse each teat ensuring that the entire surface of the teat is covered OR Spray the full length of each teat. Allow a minimum contact time of 30 seconds.
3. Refill the teat cup as necessary. Teat cups should be emptied after use and washed before re-use.
4. Wash and dry udder and teats before the next milking.
